

Bunyaville Conservation Park

Management Statement 2015

Extended March 2026

**Queensland
Government**

Prepared by: **Queensland Parks and Wildlife Service (QPWS), Department of the Environment, Tourism, Science and Innovation.**

© State of Queensland 2026

The Department of the Environment, Tourism, Science and Innovation acknowledges Aboriginal peoples and Torres Strait Islander peoples as the Traditional Owners and custodians of the land. We recognise their connection to land, sea and community, and pay our respects to Elders past and present.

The department is committed to respecting, protecting, and promoting human rights, and our obligations under the Human Rights Act 2019.

This management statement does not intend to affect, diminish, or extinguish native title or associated rights.

Park overview

Park size	Bunyaville Conservation Park	630ha
Bioregion	South Eastern Queensland	
QPWS region	South East Queensland	
Local government area	Moreton Bay City Council	
State electorate	Everton; Ferny Grove	
Relevant legislation	<i>Aboriginal Cultural Heritage Act 2003 (Qld)</i>	
	<i>Nature Conservation Act 1992</i>	
	<i>Queensland Heritage Act 1992</i>	
Plans and agreements	Japan—Australia Migratory Bird Agreement	

Park purpose

Bunyaville Conservation Park was formally gazetted as Bunyaville Forest Reserve in 2000. It was gazetted to become Bunyaville Conservation Park in 2009.

No park specific purpose was identified as part of the gazettal.

Strategic direction for park management

Based on an evaluation of its natural, cultural and presentation values, Bunyaville Conservation Park has been assessed as having a high priority for management and will be managed according to this priority rating.

Park management will be based on the best available local knowledge, professional judgement and published information. The high level means it will receive a minimum of monthly routine inspections with occasional planned visits to deliver prepared work programs and respond to issues. The focus is largely expected to be on natural resource and visitor management involving a proactive management effort at a high level to understand and protect known natural values.

Cultural values will be managed proactively to understand and protect those values known to Queensland Parks and Wildlife Services, (QPWS). Continuing engagement, consultation, collaboration and relationships with First Nations people and stakeholders will be undertaken.

This park currently has high levels of visitor use and provides a variety of visitor sites. The public may opportunistically have contact with rangers during their visit. A high level of infrastructure is provided to cater for existing levels and patterns of visitor use. High quality on-site visitor information displays are installed at key sites. Park information is available through the Departmental website.

Public consultation on park management will be undertaken through continuing engagement and involvement in management with community stakeholders.

Infrastructure is provided especially for visitor access, the protection of natural and cultural values and to enhance management capacity. There are a number of management roads that form a shared trail network that is open to and used jointly by walkers, cyclists and horse riders. Additionally there are ten designated single-use mountain bike trails available within the park. Bunyaville Environmental Education Centre is located within the park which provides classrooms and associated facilities and is a focal point for the environmental programs for many local schools.

Electricity infrastructure including a tower and transmission lines are located on Bunyaville Conservation Park. A communications facility including offices, a workshop and a decommissioned forestry nursery and water storage reservoir are also located on the park.

General park values, uses and management

Regional ecosystems

Bunyaville Conservation Park protects four regional ecosystems, two of which have of concern biodiversity status, Table 1.

Species of conservation significance

Species of conservation significance recorded from this park include one amphibian, two bird, and three mammal species, Table 2.

Cultural heritage

All protected areas are recognised as cultural landscapes and First Nations people see themselves as inextricably linked to Country both spiritually and physically. Although cultural records on physical artefacts and sites of spiritual significance are not well documented for this area, all proposed activities need to meet duty of care requirements under the *Aboriginal Cultural Heritage Act 2003*. Non-indigenous historic places will be managed in accordance with the *Queensland Heritage Act 1992*.

Priorities for park management

The of concern regional ecosystems, six animal species of conservation significance, and recreational opportunities are the main values of this park. The priorities for park management will be to mitigate any threats to these values through fire and pest management. Management actions will be undertaken which aim to ensure:

- life and property on and adjacent to the park is protected
- fire is managed to conserve or maintain the condition of the regional ecosystems through the application of planned burn guidelines
- the impacts of existing pest species on neighbouring land uses are mitigated
- pest threats are managed to conserve or maintain the condition of regional ecosystems, plant and animal species of conservation significance
- recreation and visitor opportunities are provided that enable access to and use of the park's features with minimal impacts on the environment and cultural values.

Appendix

Conservation values management

Table 1: Endangered and of concern regional ecosystems

Regional ecosystem number	Description	Biodiversity status
12.3.11	<i>Eucalyptus tereticornis</i> +/- <i>Eucalyptus siderophloia</i> , <i>Corymbia intermedia</i> open forest on alluvial plains usually near coast	Of concern
12.11.25	<i>Blakella henryi</i> and/or <i>Eucalyptus fibrosa</i> subsp. <i>fibrosa</i> +/- <i>E. crebra</i> , <i>E. carnea</i> , <i>E. tindaliae</i> woodland on metamorphics +/- interbedded volcanics	Of concern

Table 2: Species of conservation significance

Scientific name	Common name	Nature Conservation Act 1992 status	Environment Protection and Biodiversity Conservation Act 1999 (Cwlth) status
Animals			
<i>Adelotus brevis</i>	tusked frog	Vulnerable	
<i>Hirundapus caudacutus</i> ¹	white-throated needletail	Vulnerable	Vulnerable
<i>Ninox strenua</i>	powerful owl	Vulnerable	-
<i>Phascolarctos cinereus</i>	koala	Endangered	Endangered
<i>Pteropus poliocephalus</i>	grey-headed flying-fox	Least concern	Vulnerable
<i>Tachyglossus aculeatus</i>	short-beaked echidna	Special least concern	-

¹JAMBA – Japan–Australia Migratory Bird Agreement
