

Eudlo Creek Conservation Park

Management Statement 2015

Extended June 2026

Queensland
Government

Prepared by: **Queensland Parks and Wildlife Service (QPWS), Department of the Environment, Tourism, Science and Innovation.**

© State of Queensland 2026

The Department of the Environment, Tourism, Science and Innovation acknowledges Aboriginal peoples and Torres Strait Islander peoples as the Traditional Owners and custodians of the land. We recognise their connection to land, sea and community, and pay our respects to Elders past and present.

The department is committed to respecting, protecting, and promoting human rights, and our obligations under the Human Rights Act 2019.

This management statement does not intend to affect, diminish, or extinguish native title or associated rights.

Park overview

Park size	Eudlo Creek Conservation Park	99.6 ha
Bioregion	South east Queensland	
QPWS region	South east Queensland	
Local government area	Sunshine Coast Regional Council	
State electorate	Ninderry	
Relevant legislation	<i>Aboriginal Cultural Heritage Act 2003</i> (Qld)	
	<i>Environment Protection and Biodiversity Conservation Act 1999</i> (Cwlth)	
	<i>Native Title Act 1993</i> (Cwlth)	
	<i>Nature Conservation Act 1992</i>	
Plans and agreements	<i>Queensland Heritage Act 1992</i>	
	Threatened Species Action Plan 2022-2032 (Cwlth)	

Park purpose

Eudlo Creek Regional Park was formally gazetted as two separate environmental parks. Eudlo Creek (Corbould No 7) Environmental Park covering 73.248 hectares was gazetted in 1982 under the *Land Act 1962*. At that time there was a Trustee Agreement with the Maroochy Shire Council. Eudlo Creek Environmental Park was gazetted in 1974 under the *Land Act 1962* and covered 26.305 hectares. At that time there was a Trustee Agreement again with Maroochy Shire Council. In 1994 under the *Nature Conservation Act 1992* both environmental parks were combined and gazetted as Eudlo Creek Conservation Park covering 99.6 hectares.

No park specific purpose was identified as part of the gazettal.

Strategic direction for park management

Based on an evaluation of its natural, cultural and presentation values, Eudlo Creek Conservation Park has been assessed as having a medium priority for management. The park will be managed according to this priority rating.

Park management will be based on the best available local knowledge, professional judgement and anecdotal information. The medium level means that it will receive a minimum of quarterly routine inspections with occasional planned visits where issues have been identified. The focus is largely expected to be on natural resource management involving a proactive management effort at a moderate level to understand or protect known natural values.

Cultural values will be managed proactively to protect those values known to Queensland Parks and Wildlife Service, (QPWS). Ongoing consultation, collaboration and relationships with Traditional Owners and other First Nations People stakeholders will be undertaken as required to support broader continuing park management programs.

This park currently has relatively low levels of visitor use and provides a few relatively undeveloped visitor sites. Visitors are unlikely to encounter a ranger on site during their visit. Current and future recreational opportunities will require that visitors have a high level of self-sufficiency. A moderate level of infrastructure is provided to support safe and sustainable use by predominantly self-reliant visitors.

Public consultation on park management will be undertaken through ongoing local consultations with community stakeholders to support broad continuing management programs.

Park assets are functional and robust and require limited maintenance to protect the natural and cultural values and management capacity.

General park values, uses and management

Regional ecosystems

The park protects eight regional ecosystems, one which has an endangered biodiversity status and three are of concern, Table 1.

Species of conservation significance

Species of conservation significance that are recorded from this park include five plants and three animals, Table 2.

Cultural heritage

All protected areas are recognised as cultural landscapes and First Nation's people see themselves as inextricably linked to country both spiritually and physically. Although cultural records on physical artefacts and sites of spiritual significance are not well documented for this area, all proposed activities need to meet duty of care requirements under the *Aboriginal Cultural Heritage Act 2003*. Non-First Nations People historic places will be managed in accordance with the *Queensland Heritage Act 1992*.

Priorities for park management

The four regional ecosystems, five plant and three animal species of conservation significance are the main values of this park. The priorities for park management will be to mitigate any threats to these values through fire and pest management.

Management actions will be undertaken which aim to ensure:

- life and property on and adjacent to the park is protected
- fire is managed to conserve or maintain the condition of the regional ecosystems through the application of planned burn guidelines
- the impacts of existing pest species on neighbouring land uses are mitigated
- pest threats are managed to conserve or maintain the condition of regional ecosystems and the species of conservation significance.

Appendix

Tables – Conservation values management

Table 1: Endangered and of concern regional ecosystems

Regional ecosystem number	Description	Biodiversity status
12.1.1	<i>Casuarina glauca</i> woodland on margins of marine clay plains	Of concern
12.3.11	<i>Eucalyptus tereticornis</i> +/- <i>Eucalyptus siderophloia</i> , <i>Corymbia intermedia</i> open forest on alluvial plains usually near coast	Of concern
12.3.20	<i>Melaleuca quinquenervia</i> , <i>Casuarina glauca</i> +/- <i>Eucalyptus tereticornis</i> , <i>E. siderophloia</i> , <i>M. styphelioides</i> open forest on low coastal alluvial plains	Endangered
12.9-10.16	Araucarian microphyll to totophyll vine forest on Cainozoic and Mesozoic sediments	Of concern

Table 2: Species of conservation significance

Scientific name	Common name	Nature Conservation Act 1992 status	Environment Protection and Biodiversity Conservation Act 1999 (Cwlth) status
Plants			
<i>Acrostichum speciosum</i>	mangrove fern	Special least concern	
<i>Crinum pedunculatum</i>	river lily	Special least concern	
<i>Livistona australis</i>	cabbage tree palm	Special least concern	
<i>Platycerium bifurcatum</i>	-	Special least concern	
<i>Rhodomyrtus psidioides</i>	native guava	Critically endangered	Critically endangered
Animals			
<i>Pandion haliaetus cristatus</i>	eastern osprey	Special least concern	
<i>Pteropus poliocephalus</i>	grey-headed flying-fox	-	Vulnerable
<i>Xeromys myoides</i>	water mouse	Vulnerable	Vulnerable
