

Springwood Conservation Park

Management Statement 2015

Extended February 2026

Queensland
Government

Prepared by: **Queensland Parks and Wildlife Service (QPWS), Department of the Environment, Tourism, Science and Innovation.**

© State of Queensland 2026

The Department of the Environment, Tourism, Science and Innovation acknowledges Aboriginal peoples and Torres Strait Islander peoples as the Traditional Owners and custodians of the land. We recognise their connection to land, sea and community, and pay our respects to Elders past and present.

The department is committed to respecting, protecting, and promoting human rights, and our obligations under the Human Rights Act 2019.

This management statement does not intend to affect, diminish, or extinguish native title or associated rights.

Park overview

Park size	Springwood Conservation Park	29.4ha
Bioregion	South Eastern Queensland	
QPWS region	South East Queensland	
Local government area	Logan City	
State electorate	Springwood	
Relevant legislation	<i>Aboriginal Cultural Heritage Act 2003 (Qld)</i>	
	<i>Nature Conservation Act 1992</i>	
	<i>Queensland Heritage Act 1992</i>	

Park purpose

Springwood Conservation Park was formally gazetted as an environmental park in 1990. In 1994 it was gazetted to become a conservation park under the *Nature Conservation Act 1992*.

No park specific purpose was identified as part of the gazettal.

Under the *Nature Conservation Act 1992*, Logan City Council is trustee of the Park.

Strategic direction for park management

Based on an evaluation of its natural, cultural and presentation values, Springwood Conservation Park has been assessed as having a medium priority for management. The park will be managed according to this priority rating.

Park management will be based on the best available local knowledge, professional judgement and anecdotal information. The medium level means that it will receive a minimum of quarterly routine inspections with occasional planned visits where issues have been identified. The focus is largely expected to be on natural resource management involving a proactive management effort at a moderate level to understand or protect known natural values.

Cultural values will be managed proactively to protect those values known to Queensland Park and Wildlife Service, (QPWS). Ongoing consultation, collaboration and relationships with First Nations people and stakeholders will be undertaken as required to support broader continuing park management programs.

This park currently has moderate levels of visitor use and provides a few relatively undeveloped visitor sites. The park is increasingly used for personal fitness and outdoor recreation activities. The park has a number of tracks and a look-out. A moderate level of infrastructure is provided to support safe and sustainable use.

Public consultation on park management will be undertaken through ongoing local consultations with community stakeholders to support broad continuing management programs.

Park assets are functional and robust and require limited maintenance to protect the natural and cultural values and management capacity. Two 110 kV power-lines cross this conservation park.

General park values, uses and management

Regional ecosystems

The park protects four regional ecosystems, one of which is endangered, and one other with of concern biodiversity status, Table 1.

Species of conservation significance

Species of conservation significance that are recorded from this park include one mammal and one bird species and four plant species, Table 2.

Cultural heritage

All protected areas are recognised as cultural landscapes and First Nations people see themselves as inextricably linked to country both spiritually and physically. Although cultural records on physical artefacts and sites of spiritual significance are not well documented for this area, all proposed activities need to meet duty of care requirements under the *Aboriginal Cultural Heritage Act 2003*. Non-indigenous historic places will be managed in accordance with the *Queensland Heritage Act 1992*.

Priorities for park management

The regional ecosystems and two animal species of conservation significance are the main values of this park. The priorities for park management will be to mitigate any threats to these values through fire and pest management. Management actions will be undertaken which aim to ensure:

- life and property on and adjacent to the park is protected
- fire is managed to conserve or maintain the condition of the regional ecosystem through the application of planned burn guidelines
- the impacts of existing pest species on neighbouring land uses are mitigated
- pest threats are managed to conserve or maintain the condition of regional ecosystem and animal species of conservation significance.

Appendix

Conservation values inventory

Table 1: Endangered and of concern regional ecosystems

Regional ecosystem number	Description	Biodiversity status
12.5.3a	<i>Corymbia intermedia</i> , <i>Eucalyptus seeana</i> +/- <i>E. racemosa</i> subsp. <i>racemosa</i> , <i>Angophora leiocarpa</i> , <i>E. siderophloia</i> , <i>C. citriodora</i> subsp. <i>variegata</i> , <i>Lophostemon suaveolens</i> open woodland. Occurs on complex of remnant Tertiary surfaces +/- Cainozoic and Mesozoic sediments.	Endangered
12.9-10.26	<i>Eucalyptus baileyana</i> and/or <i>E. planchoniana</i> and/or <i>E. psammitica</i> woodland to open forest on quartzose sandstone	Of concern

Table 2: Species of conservation significance

Scientific name	Common name	Nature Conservation Act 1992 status	Environment Protection and Biodiversity Conservation Act 1999 (Cwlth) status
Plants			
<i>Lobelia gibbosa</i>	native lobelia	Special least concern	-
<i>Acianthus fornicatus</i>	pixie caps	Special least concern	-
<i>Corybas barbara</i>	helmet orchid	Special least concern	-
<i>Drynaria rigidula</i>		Special least concern	-
Animals			
<i>Ninox strenua</i>	powerful owl	Vulnerable	-
<i>Phascolarctos cinereus</i>	koala	Endangered	Endangered
