

Anderson Street Conservation Park

Management Statement 2015

Extended March 2026

**Queensland
Government**

Prepared by: **Queensland Parks and Wildlife Service (QPWS), Department of the Environment, Tourism, Science and Innovation.**

© State of Queensland 2026

The Department of the Environment, Tourism, Science and Innovation acknowledges Aboriginal peoples and Torres Strait Islander peoples as the Traditional Owners and custodians of the land. We recognise their connection to land, sea and community, and pay our respects to Elders past and present.

The department is committed to respecting, protecting, and promoting human rights, and our obligations under the Human Rights Act 2019.

This management statement does not intend to affect, diminish, or extinguish native title or associated rights.

Park overview

Park size	Anderson Street Conservation Park	1.2ha
Bioregion	Wet Tropics	
QPWS region	Northern	
Local government area	Cairns Regional	
State electorate	Cairns	
Relevant legislation	<i>Aboriginal Cultural Heritage Act 2003 (Qld)</i>	
	<i>Nature Conservation Act 1992</i>	
	<i>Queensland Heritage Act 1992</i>	

Park purpose

Anderson Street Conservation Park was formally gazetted as an environmental park in 1976. In 1994 it became a conservation park under the *Nature Conservation Act 1992*.

No park specific purpose was identified as part of the gazettal. It protects a colony of spectacled flying-fox *Pteropus conspicillatus*.

Under the *Nature Conservation Act 1992*, Cairns Regional Council is trustee of the park.

Strategic direction for park management

Based on an evaluation of its natural, cultural and presentation values, Anderson Street Conservation Park has been assessed as having a basic level of priority for management and will be managed according to this priority rating.

Park management will be based on the best available local knowledge, professional judgement and anecdotal information. The basic level priority means it will receive annual routine inspections with occasional planned visits where issues have been identified. The focus is largely expected to be on natural resource management involving proactive management to understand and protect known natural values.

Cultural values will be managed proactively to protect those values known to Queensland Parks and Wildlife Services, (QPWS). Informal ad-hoc local consultation, collaboration and relationships with First Nations people and stakeholders will be undertaken as required to progress specific issues and programs.

This park currently has low levels of infrequent visitor use largely from local residents. Visitors are unlikely to encounter a ranger on site during their visit.

Informal ad-hoc consultation with community stakeholders will be undertaken on specific issues of park management.

Park assets will consist of minimal robust infrastructure which is required for the protection of natural and cultural values.

General park values, uses and management

Regional ecosystems

Anderson Street Conservation Park protects one regional ecosystem. This ecosystem has endangered biodiversity status, Table 1.

Species of conservation significance

Species of conservation significance recorded from this park include the spectacled flying-fox *Pteropus conspicillatus*, Table 2.

Cultural heritage

All protected areas are recognised as cultural landscapes and First Nations people see themselves as inextricably linked to Country both spiritually and physically. Although cultural records on physical artefacts and sites of spiritual significance are not well documented for this area, all proposed activities need to meet duty of care requirements under the *Aboriginal Cultural Heritage Act 2003*. Non-indigenous historic places will be managed in accordance with the *Queensland Heritage Act 1992*.

Priorities for park management

The endangered regional ecosystem and spectacled flying-fox species of conservation significance are the main values of this park. The priorities for park management will be to mitigate any threats to these values through fire and pest management.

Management actions will be undertaken which aim to ensure:

- life and property on and adjacent to the park is protected
- fire is managed to conserve or maintain the condition of the regional ecosystem through the application of planned burn guidelines
- the impacts of existing pest species on neighbouring land uses are mitigated
- pest threats are managed to conserve or maintain the condition of the regional ecosystem and flying-fox camp site.

Appendix

Conservation values inventory

Table 1: Endangered and of concern regional ecosystems

Regional ecosystem number	Description	Biodiversity status
7.2.8	<i>Melaleuca leucadendra</i> open forest to woodland on sands of beach origin	Endangered

Table 2: Species of conservation significance

Scientific name	Common name	Nature Conservation Act 1992 status	Environment Protection and Biodiversity Conservation Act 1999 (Cwilt) status
Animals			
<i>Pteropus conspicillatus</i>	spectacled flying-fox	Endangered	Endangered
