

Wararba Creek Conservation Park

Management Statement 2015

Extended February 2026

**Queensland
Government**

Prepared by: **Queensland Parks and Wildlife Service (QPWS), Department of the Environment, Tourism, Science and Innovation.**

© State of Queensland 2026

The Department of the Environment, Tourism, Science and Innovation acknowledges Aboriginal peoples and Torres Strait Islander peoples as the Traditional Owners and custodians of the land. We recognise their connection to land, sea and community, and pay our respects to Elders past and present.

The department is committed to respecting, protecting, and promoting human rights, and our obligations under the Human Rights Act 2019.

This management statement does not intend to affect, diminish, or extinguish native title or associated rights.

Park overview

Park size	Wararba Creek Conservation Park	88ha
Bioregion	South Eastern Queensland	
QPWS region	South East Queensland	
Local government area	Moreton Bay City	
State electorate	Glass House	
Relevant legislation	<i>Aboriginal Cultural Heritage Act 2003 (Qld)</i>	
	<i>Nature Conservation Act 1992</i>	
	<i>Land Act 1962</i>	
	<i>Queensland Heritage Act 1992</i>	

Park purpose

Wararba Creek Conservation Park was formerly gazetted as Wararba Creek (Corbould No 4) Environmental Park in 1982 under the *Land Act 1962*. At that time there was a Trustee Agreement with Carboolture Shire Council. In 1994 the environmental park was gazetted to Wararba Creek Conservation Park under the *Nature Conservation Act 1992*.

No park specific purpose was identified as part of the gazettal.

Under the *Nature Conservation Act 1992*, Moreton Bay Regional Council is the trustee of the park.

Strategic direction for park management

Based on an evaluation of its natural, cultural and presentation values, Wararba Creek Conservation Park has been assessed as having a basic level of priority for management and will be managed according to this priority rating.

Park management will be based on the best available local knowledge, professional judgement and anecdotal information. The basic level priority means it will receive annual routine inspections with occasional planned visits where issues have been identified. The focus is largely expected to be on natural resource management involving proactive management to understand and protect known natural values.

Cultural values will be managed proactively to protect those values known to Queensland Parks and Wildlife Service, (QPWS). Informal ad-hoc local consultation, collaboration and relationships with First Nations people and stakeholders will be undertaken as required to progress specific issues and programs.

This park currently has low levels of infrequent visitor use and provides a few relatively undeveloped visitor sites. Visitors are unlikely to encounter a ranger on site during their visit. Current and future recreational opportunities will require that visitors have a high level of self-sufficiency and are primarily responsible for their own personal safety.

Informal ad-hoc consultation with community stakeholders will be undertaken on specific issues of park management.

Park assets will consist of minimal robust infrastructure which is required for the protection of natural and cultural values and self-reliant use by the public.

General park values, uses and management

Regional ecosystems

Wararba Creek Conservation Park protects three regional ecosystems, all of which have the biodiversity status of no concern at present.

Species of conservation significance

Species of conservation significance recorded from this park include one plant species, *Pararistolochia praevenosa*, Table 1.

Cultural heritage

All protected areas are recognised as cultural landscapes and First Nations people see themselves as inextricably linked to Country both spiritually and physically. Although cultural records on physical artefacts and sites of spiritual significance are not well documented for this area, all proposed activities need to meet duty of care requirements under the *Aboriginal Cultural Heritage Act 2003*. Non-indigenous historic places will be managed in accordance with the *Queensland Heritage Act 1992*.

Priorities for park management

The one plant species of conservation significance and regional ecosystems are the main values of this park. The priorities for park management will be to mitigate any threats to these ecosystems and plant species through fire and pest management.

Management actions will be undertaken which aim to ensure:

- life and property on and adjacent to the park is protected
- fire is managed to conserve or maintain the condition of the regional ecosystems through the application of planned burn guidelines
- the impacts of existing pest species on neighbouring land uses are mitigated
- pest threats are managed to conserve or maintain the condition of the species of conservation significance.

Appendix

Conservation values inventory
