

Warrina Conservation Park

Management Statement 2015

Extended May 2026

Queensland
Government

Prepared by: **Queensland Parks and Wildlife Service (QPWS), Department of the Environment, Tourism, Science and Innovation.**

© State of Queensland 2026

The Department of the Environment, Tourism, Science and Innovation acknowledges Aboriginal peoples and Torres Strait Islander peoples as the Traditional Owners and custodians of the land. We recognise their connection to land, sea and community, and pay our respects to Elders past and present.

The department is committed to respecting, protecting, and promoting human rights, and our obligations under the Human Rights Act 2019.

This management statement does not intend to affect, diminish, or extinguish native title or associated rights.

Park overview

Park size	Warrina Conservation Park	14.6ha
Bioregion	Wet Tropics	
QPWS region	Northern	
Local government area	Cassowary Coast Regional Council	
State electorate	Hill	
Relevant legislation	<i>Aboriginal Cultural Heritage Act 2003 (Qld)</i>	
	<i>Nature Conservation Act 1992</i>	
	<i>Queensland Heritage Act 1992</i>	

Park purpose

Warrina Conservation Park was formally gazetted as Warrina Environmental Park on 24 February 1990 under the *Land Act 1962*. In 1994, the environmental park was gazetted as Warrina Conservation Park under the *Nature Conservation Act 1992*.

No park specific purpose was identified as part of the gazettal.

Strategic direction for park management

Based on an evaluation of its natural, cultural and presentation values, Warrina Conservation Park has been assessed as having a basic level of priority for management and will be managed according to this priority rating.

Park management will be based on the best available local knowledge, professional judgement and anecdotal information. The basic level priority means it will receive annual routine inspections with occasional planned visits where issues have been identified. The focus is largely expected to be on natural resource management involving proactive management to understand and protect known natural values.

Cultural values will be managed proactively to protect those values known to Queensland Parks and Wildlife Service, (QPWS). Informal ad hoc local consultation, collaboration and relationships with First Nations people and stakeholders will be undertaken as required to progress specific issues and programs.

This park currently has low levels of infrequent visitor use and provides a few relatively undeveloped visitor sites. Visitors are unlikely to encounter a ranger on site during their visit. Current and future recreational opportunities will require that visitors have a high level of self-sufficiency and are primarily responsible for their own personal safety.

Informal ad hoc consultation with community stakeholders will be undertaken on specific issues of park management.

Park assets will consist of minimal robust infrastructure which is required for the protection of natural and cultural values and self-reliant use by the public.

General park values, uses and management

Regional ecosystems

Warrina Conservation Park protects two regional ecosystems, all of which have endangered biodiversity status, Table 1.

Species of conservation significance

Species of conservation significance recorded from this park include two plant species *Stenochlaena Palustris* climbing swamp fern and *Telmatoblechnu m indicum*, Table 2.

Cultural heritage

All protected areas are recognised as cultural landscapes and First Nations people see themselves as inextricably linked to Country both spiritually and physically. Although cultural records on physical artefacts and sites of spiritual significance are not well-documented for this area, all proposed activities need to meet duty of care requirements under the *Aboriginal Cultural Heritage Act 2003*. Non-indigenous historic places will be managed in accordance with the *Queensland Heritage Act 1992*.

Priorities for park management

The two regional ecosystems and two plant species of conservation significance are the main values of this park. The priorities for park management will be to mitigate any threats to these values through fire and pest management.

Management actions will be undertaken which aim to ensure:

- life and property on and adjacent to the park is protected
- fire is managed to conserve or maintain the condition of the regional ecosystems through the application of planned burn guidelines
- the impacts of existing pest species on neighbouring land uses are mitigated
- pest threats are managed to conserve or maintain the condition of these two regional ecosystems and two plant species.

Appendix

Conservation values management

Table 1: Endangered and of concern regional ecosystems

Regional ecosystem number	Description	Biodiversity status
7.3.10a	Simple-complex mesophyll to notophyll vine forest on moderate to poorly drained alluvial plains of moderate fertility.	Endangered
7.3.10c	Simple-complex mesophyll to notophyll vine forest on moderate to poorly drained alluvial plains of moderate fertility.	Endangered

Table 2: Species of conservation significance

Scientific name	Common name	Nature Conservation Act 1992 status	Environment Protection and Biodiversity Conservation Act 1999 (Cwlth) status
Plants			
<i>Stenochlaena palustris</i>	climbing swamp fern	Special Least Concern	
<i>Telmatoblechnum indicum</i>		Special Least Concern
