

Lark Quarry Conservation Park

Management Statement 2015

Extended March 2026

Queensland
Government

Prepared by: **Queensland Parks and Wildlife Service (QPWS), Department of the Environment, Tourism, Science and Innovation.**

© State of Queensland 2026

The Department of the Environment, Tourism, Science and Innovation acknowledges Aboriginal peoples and Torres Strait Islander peoples as the Traditional Owners and custodians of the land. We recognise their connection to land, sea and community, and pay our respects to Elders past and present.

The department is committed to respecting, protecting, and promoting human rights, and our obligations under the Human Rights Act 2019.

This management statement does not intend to affect, diminish, or extinguish native title or associated rights.

Park overview

Park size	Lark Quarry Conservation Park	1400ha
Bioregion	Channel Country (88.2%) Mitchell Grass Downs (11.8%)	
QPWS region	Central	
Local government area	Winton Shire Council	
State electorate	Gregory	
Relevant legislation	<i>Aboriginal Cultural Heritage Act 2003 (Qld)</i> <i>Nature Conservation Act 1992</i> <i>Queensland Heritage Act 1992</i>	

Park purpose

Lark Quarry Conservation Park was formally gazetted as an environmental park 1982 under the *Land Act 1962*. The parcel tenure was converted to a conservation park in 1994 under the *Nature Conservation Act 1992*.

Lark Quarry was gazetted to protect more than 4000 preserved dinosaur footprints that are over 95 million years old.

Under the *Nature Conservation Act 1992*, Winton Shire Council is the trustee of the park.

Strategic direction for park management

Based on an evaluation of its natural, cultural and presentation values, Lark Quarry Conservation Park has been assessed as having a medium priority for management. The park will be managed according to this priority rating.

Park management will be based on the best available local knowledge, professional judgement and anecdotal information. The medium level means that it will receive a minimum of quarterly routine inspections with occasional planned visits where issues have been identified. The focus is largely expected to be on natural resource management involving a proactive management effort at a moderate level to understand or protect known natural and cultural values.

Cultural values will be managed proactively to protect those values known to Queensland Parks and Wildlife Services, (QPWS). Ongoing consultation, collaboration and relationships with First Nations people and stakeholders will be undertaken as required to support broader continuing park management programs.

This park currently has relatively low levels of visitor use and provides a few relatively undeveloped visitor sites. Visitors are unlikely to encounter a ranger on site during their visit. Current and future recreational opportunities will require that visitors have a high level of self-sufficiency. A moderate level of infrastructure is provided to support safe and sustainable use by predominantly self-reliant visitors. General park information is provided off-site, primarily through the Departmental website.

Public consultation on park management will be undertaken through ongoing local consultations with community stakeholders to support broad continuing management programs.

Park assets are functional and robust and require limited maintenance to protect the natural and cultural values and management capacity. A 19.1 kV power line crosses this park.

General park values, uses and management

Regional ecosystems

The park protects twelve regional ecosystems, all of which have a biodiversity conservation status of no concern at present.

Species of conservation significance

There are currently two records of species of conservation significance on Queensland Government wildlife databases for this park, Table 1.

Cultural heritage

All protected areas are recognised as cultural landscapes and First Nations people see themselves as inextricably linked to Country both spiritually and physically. Cultural records on physical artefacts and sites of spiritual significance are documented for this area. All proposed activities need to meet duty of care requirements under the *Aboriginal Cultural Heritage Act 2003*. Non-indigenous historic places will be managed in accordance with the *Queensland Heritage Act 1992*.

Priorities for park management

The dinosaur track-way is the main value of this park. The priorities for park management will be to mitigate any threats to this geological feature.

Management actions will be undertaken which aim to ensure:

- life and property on and adjacent to the park is protected
- fire is managed to conserve or maintain the condition of the regional ecosystems through the application of planned burn guidelines
- the impacts of existing pest species on neighbouring land uses are mitigated
- pest threats are managed to conserve or maintain the condition of the dinosaur track-way.

Appendix
