

Mount Beau Brummell Conservation Park

Management Statement 2015

Extended February 2026

Queensland
Government

Prepared by: **Queensland Parks and Wildlife Service (QPWS), Department of the Environment, Tourism, Science and Innovation.**

© State of Queensland 2026

The Department of the Environment, Tourism, Science and Innovation acknowledges Aboriginal peoples and Torres Strait Islander peoples as the Traditional Owners and custodians of the land. We recognise their connection to land, sea and community, and pay our respects to Elders past and present.

The department is committed to respecting, protecting, and promoting human rights, and our obligations under the Human Rights Act 2019.

This management statement does not intend to affect, diminish, or extinguish native title or associated rights.

Park overview

Park size	Mount Beau Brummell Conservation Park	156.6ha
Bioregion	South Eastern Queensland	
QPWS region	South East Queensland	
Local government area	Ipswich City	
State electorate	Scenic Rim	
Relevant legislation	<i>Aboriginal Cultural Heritage Act 2003 (Qld)</i>	
	<i>Nature Conservation Act 1992</i>	
	<i>Queensland Heritage Act 1992</i>	
Plans and agreements	Convention on the Conservation of Migratory Species (CMS)	
	China—Australia Migratory Bird Agreement	
	Japan—Australia Migratory Bird Agreement	
	Republic of Korea—Australia Migratory Bird Agreement	

Park purpose

Mount Beau Brummell Conservation Park was formally gazetted as a conservation park in 1975.

No park specific purpose was identified as part of the gazettal.

Under the *Nature Conservation Act 1992*, Ipswich City Council is the trustee of the park.

Strategic direction for park management

Based on an evaluation of its natural, cultural and presentation values, Mount Beau Brummell Conservation Park has been assessed as having a basic priority for management. The park will be managed according to this priority rating.

Park management will be based on the best available local knowledge, professional judgement and anecdotal information. The basic level means that it will receive annual routine inspections with occasional planned visits where issues have been identified. The focus is largely expected to be on natural resource management involving a proactive management to understand or protect known natural values.

Cultural values will be managed proactively to protect those values known to Queensland Park and Wildlife Service, (QPWS). Ongoing consultation, collaboration and relationships with First Nations people and stakeholders will be undertaken as required to support broader continuing park management programs.

This park currently has very low levels of infrequent visitor use and provides no visitor sites. Visitors are unlikely to encounter a ranger on site during their visit. Current and future recreational opportunities will require that visitors have a high level of self-sufficiency.

Informal ad-hoc consultation with community stakeholders will be undertaken on specific issues of park management. No assets exist on park.

General park values, uses and management

Regional ecosystems

The park protects four regional ecosystems of which one has of concern biodiversity status, Table 1.

Species of conservation significance

Species of conservation significance that are recorded from this park include the vulnerable brush-tailed rock-wallaby *Petrogale penicillata*, Table 2.

Cultural heritage

All protected areas are recognised as cultural landscapes and First Nations people see themselves as inextricably linked to Country both spiritually and physically. Although cultural records on physical artefacts and sites of spiritual significance are not well documented for this area, all proposed activities need to meet duty of care requirements under the *Aboriginal Cultural Heritage Act 2003*. Non-indigenous historic places will be managed in accordance with the *Queensland Heritage Act 1992*.

Priorities for park management

The one of concern regional ecosystem and the brush-tailed rock wallaby are the main values of this park. Park management will be limited to those actions undertaken through the annual inspection.

Appendix

Conservation values management

Table 1: Endangered and of concern regional ecosystems

Regional ecosystem number	Description	Biodiversity status
12.8.16	<i>Eucalyptus crebra</i> +/- <i>E. melliodora</i> , <i>E. tereticornis</i> subsp. Basaltica woodland on Cainozoic igneous rocks	Of concern

Table 2: Species of conservation significance

Scientific name	Common name	Nature Conservation Act 1992 status	Environment Protection and Biodiversity Conservation Act 1999 (Cwlth) status
