

Moggill Conservation Park

Management Statement 2015

Extended April 2026

Queensland
Government

Prepared by: **Queensland Parks and Wildlife Service (QPWS), Department of the Environment, Tourism, Science and Innovation.**

© State of Queensland 2026

The Department of the Environment, Tourism, Science and Innovation acknowledges Aboriginal peoples and Torres Strait Islander peoples as the Traditional Owners and custodians of the land. We recognise their connection to land, sea and community, and pay our respects to Elders past and present.

The department is committed to respecting, protecting, and promoting human rights, and our obligations under the Human Rights Act 2019.

This management statement does not intend to affect, diminish, or extinguish native title or associated rights.

Park overview

Park size	Moggill Conservation Park	488ha
Bioregion	South Eastern Queensland	
QPWS region	South East Queensland	
Local government area	Brisbane City	
State electorate	Moggill	
Relevant legislation	<i>Aboriginal Cultural Heritage Act 2003 (Qld)</i>	
	<i>Nature Conservation Act 1992</i>	
	<i>Queensland Heritage Act 1992</i>	
Plans and agreements	Convention on the Conservation of Migratory Species (CMS)	
	China—Australia Migratory Bird Agreement	
	Japan—Australia Migratory Bird Agreement	
	Republic of Korea—Australia Migratory Bird Agreement	

Park purpose

Moggill Conservation Park was gazetted to forest reserve from State forest in 2000. The parcel was converted to become a conservation park in 2009 under the *Nature Conservation Act 1992*.

No park specific purpose was identified as part of the gazettal.

Strategic direction for park management

Based on an evaluation of its natural, cultural and presentation values, Moggill Conservation Park has been assessed as having a medium priority for management. The park will be managed according to this priority rating.

Park management will be based on the best available local knowledge, professional judgement and anecdotal information. The medium level means that it will receive a minimum of quarterly routine inspections with occasional planned visits where issues have been identified. The focus is largely expected to be on natural resource management involving a proactive management effort at a moderate level to understand or protect known natural values.

Cultural values will be managed proactively to protect those values known to Queensland Parks and Wildlife Service, QPWS. Ongoing consultation, collaboration and relationships with First Nations people and stakeholders will be undertaken as required to support broader continuing park management programs.

This park currently has relatively low levels of visitor use and provides a few relatively undeveloped visitor sites. Visitors are unlikely to encounter a ranger on site during their visit. Current and future recreational opportunities will require that visitors have a high level of self-sufficiency. A moderate level of infrastructure is provided to support safe and sustainable use by predominantly self-reliant visitors. General park information is provided off-site, primarily through the Departmental website.

Public consultation on park management will be undertaken through ongoing local consultations with community stakeholders to support broad continuing management programs.

Park assets are functional and robust and require limited maintenance to protect the natural and cultural values and management capacity. Electricity infrastructure and four 275kV power-lines are located in Moggill Conservation Park.

General park values, uses and management

Regional ecosystems

The park protects 13 regional ecosystems, two of which have of concern and one has endangered biodiversity status, Table 1.

Species of conservation significance

Species of conservation significance that are recorded from this park include 11 plant and eight animal species, Table 2.

Cultural heritage

All protected areas are recognised as cultural landscapes and First Nations people see themselves as inextricably linked to Country both spiritually and physically. Although cultural records on physical artefacts and sites of spiritual significance are not well documented for this area, all proposed activities need to meet duty of care requirements under the *Aboriginal Cultural Heritage Act 2003*. Non-indigenous historic places will be managed in accordance with the *Queensland Heritage Act 1992*.

Priorities for park management

The of concern and endangered regional ecosystems, 11 plant, and eight animal species of conservation significance are the main values of this park. The priorities for park management will be to mitigate any threats to these values through fire and pest management. Management actions will be undertaken which aim to ensure:

- life and property on and adjacent to the park is protected
- fire is managed to conserve or maintain the condition of the regional ecosystems through the application of planned burn guidelines
- the impacts of existing pest species on neighbouring land uses are mitigated
- pest threats are managed to conserve or maintain the condition of regional ecosystems, plant and animal species of conservation significance.

Appendix

Conservation values management

Table 1: Endangered and of concern regional ecosystems

Regional ecosystem number	Description	Biodiversity status
12.11.25	<i>Corymbia henryi</i> and/or <i>Eucalyptus fibrosa</i> subsp. <i>fibrosa</i> +/- <i>E. crebra</i> , <i>E. carnea</i> , <i>E. tindaliae</i> woodland on metamorphics +/- interbedded volcanics	Of concern
12.3.16	Complex notophyll to microphyll vine forest on alluvial plains	Endangered
12.3.7	<i>Eucalyptus tereticornis</i> , <i>Casuarina cunninghamiana</i> subsp. <i>cunninghamiana</i> +/- <i>Melaleuca</i> spp. fringing woodland	Of concern

Table 2: Species of conservation significance

Scientific name	Common name	Nature Conservation Act 1992 status	Environment Protection and Biodiversity Conservation Act 1999 (Cwlth) status
Plants			
<i>Notelaea lloydii</i>	Lloyd's native olive	Vulnerable	Vulnerable
<i>Sophora fraseri</i>	brush Sophora	Vulnerable	Vulnerable
<i>Symplocos harroldii</i>	hairy hazelwood	Near Threatened	-
<i>Gossia hillii</i>		<i>Critically Endangered</i>	-
<i>Acianthus fornicatus</i>	pixie caps	Special least Concern	-
<i>Cheirostylis notialis</i>		Special least Concern	-
<i>Corybas barbarae</i>	helmet orchid	Special least Concern	-
<i>Microsorium grossum</i>		Special least Concern	-
<i>Adiantum hispidulum</i> var. <i>whitei</i>		Special least Concern	-
<i>Pellaea paradoxa</i>	heart fern	Special least Concern	-
<i>Macrozamia macleayi</i>		Special least Concern	-
Animals			
<i>Cuculus optatus</i> ²³⁴	oriental cuckoo	Special Least Concern	-
<i>Hirundapus caudacutus</i> ²³⁴	white-throated needletail	Vulnerable	Vulnerable
<i>Ninox strenua</i>	powerful owl	Vulnerable	-
<i>Pandion haliaetus cristatus</i>	eastern osprey	Special Least Concern	-
<i>Phascolarctos cinereus</i>	koala	Endangered	Endangered
<i>Plegadis falcinellus</i> ²³⁴	glossy ibis	Special Least Concern	-
<i>Adelotus brevis</i>	tusked frog	Vulnerable	-
<i>Turnix melanogaster</i>	black-breasted button-quail	Vulnerable	Vulnerable
